RE: 071713 - 194678S419379

Chris:

Congratulations! Information in our data base has positively affirmed the engine pad of your 1968, L88.

We do note that your engine pad has a unique assembly code stamping and surface. The suffix application was hand stamped as an after-strike, and in that process an inverted "1" was used instead of the character "L." Also, the pad surface and initial assembly code was removed during the manufacturing process. Removal of initial steel stamped information for repair or manifest modification by engine assembly plants was not uncommon! Fortunately, the subsequently steel stamped assembly code (which is currently in place) and the later St. Louis applied VIN derivative - remain clearly present and identifiable, allowing for positive affirmation by comparison to identical suffix code / assembly dates and VIN derivative sequences! Therefore, the validity of your engine is positively affirmed by objective image confirmation and other data!

However, with the unique suffix after-strike and partial surface removal, evaluation of the pad at judging events will face standards like: "presence of broach marks" and "typical factory production." Therefore, please be aware that with on-field judging situations CCAS, LLC affirmations are not applicable or appropriate and specifically have no influence. Further, that is neither the intent nor purpose of our program! Evaluations and ratings of your engine based on guidelines using non-specific standards like: "typical", "normal", "appropriate", "usual", "correct", "my car has" and "I don't like it", etc., - are not predicable.

This note is a strong and important supplement to your registered certificate. CCAS keeps copies of all positive evaluation communications and certificates in our files. In that regard, please keep this letter with your records.

Thank you very much for engaging CCAS, LLC for the affirmation of your Corvette. We hope to serve you and your cars in the future.

Yours truly,

Al Grenning for CCAS, LLC

Cylinder Case - Engine Pad

Affirmation Certificate

CLASSIC CAR AFFIRMATION SERVICE, LLC

Presented to: Christopher Piscitello

Registration Number 071713

This certificate presented to the owner above affirms that the cylinder case pad stampings evaluated on this date, July 17, 2013 satisfy all requirements for legitimacy as demonstrated in our CCAS, LLC Data Base Research Library and will be in effect for as long as he or she owns the vehicle.

Full Vehicle Identification Number 1946785419379

Casting Number 3916321 **Casting Date** I277

Assembly Date T0328IT **VIN Derivative** 185419379

Formal Date of Affirmation July 18, 2013

Al Gorman, for - Classic Car Affirmation Service, LLC

Engine pad affirmation is addressed by our major photographic research library

CCAS, LLC does not provide appraisals or set values. It specifically does not address any degree of wear, tear, collision damage or functionality! CCAS, LLC does not guaranty positive evaluation within or apart from judging venues. Cars are judged following rules of the event as perceived on the day of evaluation. Owners must accept that judge's opinions do vary in a subjective environment. Whatever the level of affirmation, CCAS, LLC, evaluations specifically do not guarantee or imply any increase or decrease in a car's value. Further, there is no guarantee that any CCAS, LLC affirmation is accurate other than it is based on the most credible objective research available on the date of the evaluation. Finally, affirmation only applies as long as the owner of record retains his or her vehicle. A dated owner's statement and photographic record of all positive affirmations become the sole property of CCAS, which are kept on permanent file.

What CCAS, LLC does offer are: analytical affirmations for engine pad - cylinder case legitimacy based on tangible, objective Corvette research more than 25 years in the making. When positively affirmed through objective analysis, CCAS, LLC is able to provide an Officially Registered Certificate.

In addition to instances where standards are not met there may be occasions when CCAS, LLC is unable to affirm legitimacy because of obfuscation due to damage, missing components or rare gaps in research. In these cases NO evaluation will be awarded. Therefore, cars having aspects that are not affirmable, NEVER receive NEGATIVE evaluations and no records is/are ever retained. In these instances CCAS, LLC is simply unable to affirm legitimacy. No connotation - positive or negative is associated.

Finally, as long as the engine pad remains undisturbed, the state of vehicle restoration is totally irrelevant to successful application of the CCAS, LLC Affirmation Service.
